

PRESS RELEASE

CORETEC DENVER, INC. ACHIEVES NADCAP ACCREDITATION

Coretec Denver Inc, a wholly owned subsidiary of Coretec Inc. (TSX:CYY), a leading designer and manufacturer of printed circuit boards (PCBs) is pleased to announce it achieved Nadcap accreditation for Electronics from PRI (Performance Review Institute) in December 2008. This highly valued accreditation recognized by the aerospace and defense industries is added to Coretec's current world class approvals of: MIL-PRF-55110, MIL-PRF-31032, MIL-PRF-50884; AS9100; ISO9001, ISO14000; UL, CGP and ITAR.

About Nadcap

Nadcap (formerly NADCAP, the National Aerospace and Defense Contractors Accreditation Program) is a global cooperative standards-setting program for [aerospace engineering](#), [defense](#) and related industries. It is focused on the continual improvement of quality, reduction of costs and standardization of quality assurance initiatives for the aerospace and defense industries. Nadcap brings together technical experts from industry and government to address conformity assessment and facilitates relationships between member companies and accredited suppliers. Nadcap is administered by the Performance Review Institute (PRI), a not-for profit group providing international, unbiased, independent certification for Services and the Manufacturing of products such as Printed Circuit Boards.

For more information on Nadcap Certification, please refer to the Performance Review Institute at <http://www.pri-network.org/PRI/>

About Coretec

Coretec is one of the leading designers and fabricators of printed circuit boards in North America. Coretec distinguishes itself from its competitors by providing an extensive suite of printed circuit board services including field applications engineering support and education; technology roadmap consulting, CAD layout; rapid response manufacturing for prototypes; quick turn production for small-to-middle volume quantity requirements; and facilitation of higher volume requirements via partnerships in lower cost jurisdictions. The Company is also differentiated by its broad range of PCB technologies.
